DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II (claims 1 and 6-9) in the reply filed on May 5, 2005 is acknowledged. Claims 2-5 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention.

Drawings

2. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3724

4. Claims 1 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by European Publication 0 752 300 (EP '300).

EP '300 discloses a saw with every structural limitation of the claimed invention including a base (e.g., 12), a saw assembly including a blade (e.g., 16), and a fence assembly attached to the base, the fence assembly comprising a fixed fence (e.g., the front portion of 48) a movable fence (e.g., 32) defining a first support plane (e.g., at 67), and an auxiliary fence (e.g., the rear portion of 48 and/or 79) which defines a second support plane (e.g., which supports-in-part the movable fence) substantially parallel to the first support plane, wherein the fixed fence has a support surface (e.g., at 107) that is substantially parallel to an upper surface of the base, substantially perpendicular to the first support plane, and wherein the first fence has a surface (e.g., 63) which is substantially coplanar with the first support plane.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al., pn 4,869,142.

Sato discloses a saw (e.g., see Fig. 9) with almost every structural limitation of the claimed invention including a fixed fence (e.g., 3) and an auxiliary fence (e.g., 37),

Art Unit: 3724

but lacks a movable fence. However, the Examiner takes Official notice that such movable fences are old and well known in the art and provide various well known benefits including configuring the fence assembly to correspond to a particular work piece and/or cutting operation. O'Banion et al. discloses one example of such a fence assembly configuration. It is noted that claims 6-9 are met by either Sato or Sato modified by the known prior art including O'Banion. Therefore, it would have been obvious to one having ordinary skill in the art to provide a movable fence on the fence assembly of Sato (e.g., by replacing fence 3 with a fence assembly such as that disclosed by O'Banion) for the well known benefits including those described above.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
